About TUXDOC Inc. This is a free sample of the Australian Standard (AS) 1684.2-2010 Residential timber-framed construction Part 2: Non-Cyclonic Areas, which is a 9-page document. You can access the full version at . This standard was prepared by Committee TM-002, Timber Framing. The following organizations are represented on this committee: • A3P • Association of Consulting Engineers, Australia • Australian Building Codes Board • Australian Institute of Building • Building Research Association of New Zealand • CSIRO Manufacturing and Infrastructures Technology • Engineered Wood Products Association of Australasia • Engineers Australia • Forest Industries Federation (WA) • Frame and Truss Manufacturers Association Australia • Housing Industry Association • Master Builders, Australia • New Zealand Timber Industry Federation • Scion • South Australian Housing Trust • Timber and Building Materials Association, NSW • Timber Development Association, NSW • Timber Queensland Mr. Peter Juniper also has an additional interest in this standard. The Australian Standard is a living document that reflects progress in science, technology, and systems. It is periodically reviewed and new editions are published to keep it up-to-date. Between editions, amendments may be issued. Standards may also be withdrawn. It is important for readers to ensure they are using a current standard, which should include any amendments that have been published since the standard was published. For more information about Australian Standards, drafts, amendments, and new projects, visit www.standards.org.au. Standards Australia welcomes suggestions for improvements and encourages readers to notify them immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.org.au or write to Standards Australia, GPO Box 476, Sydney, NSW 2001. Revised standards were released in 1999 and 2010. Permission is required to reproduce copyrighted material from Standards Australia. The document, a free 9-page sample, is available online at its full version via the given URL. It was uploaded by a user with permission to share. To report copyright concerns, use the DMCA form provided.
